

## Professional Learning for Educators & School Leaders

MindPrint Learning partners with schools and districts to deliver high-impact, flexible professional learning that equips educators and administrators to drive student achievement and confidently implement MindPrint.

### Introduction to the Science of Learning

*One time, 2-3 hours*

**Most  
Popular!**

An engaging session for all stakeholders to understand the fundamentals of cognitive variability and its impact on teaching and learning. Participants leave this session with their own learner profile and a new outlook on the diverse learning strengths and needs in their classrooms.

***MindPrint's most popular workshop and is consistently lauded by teachers and administrators as one of the best PD sessions they've ever had!***

### Administrator Strategic Planning

*One time per year, 1 hour*

During this session, leaders adopt a new lens to interpret their school data. MindPrint's team will highlight your key trends by grade level and school and how cognitive skills are affecting academic achievement. Administrators leave this session with a prioritized list of the most important Tier 1 strategies and an improved approach for identifying which students will benefit the most from intervention and acceleration.

***During this session leaders will use MindPrint results to finalize data-driven strategic plans.***

**FREE with  
purchase of 50  
assessments!**

### Virtual Teacher Workshops

*Unlimited, 1 hour each*

**Flexible,  
Practical,  
Effective!**

During these interactive virtual sessions, educators take a deep dive into the most important skills affecting their students' achievement. Teachers leave with an understanding of the reasons for student behavior and past performance and learn how to adopt evidence-based strategies to accelerate growth.

***New for 2025-26 to meet the needs of all educators.***

## Only at MindPrint: Virtual Teacher Workshops

Educators choose the topics that meet their needs and interests so there's no limit to adult learning.

**Unlimited Access!**

### Participants will:

- + Use MindPrint data to understand why students need support in one area and not another.
- + Discover which evidence-based strategies will be most effective and why.
- + Learn how to easily integrate strategies into existing classroom practice.
